

In the Specification:

Please delete the Abstract of the Disclosure and substitute the following therefore:

*B1*  
--An article storage display tower for storage, display and continuous easy access to the articles is provided. The display tower has a top and a bottom with a cell structure having a plurality of cells positioned between the top and the bottom. Each of the cells of the tower can store and display a plurality of articles, such as compact discs, while allowing access to the articles. The cell structure is rotatably connected to a base that permits the cell structure to rotate about an axis perpendicular to the base, so that access to all cells is facilitated.--
